Warranty, Claims & Information

American Woodmark Limited Lifetime Warranty

The manufacturer of American Woodmark warrants to the original residential or commercial purchaser that all American Woodmark cabinets and accessories are free from defects in materials and workmanship for the following durations, subject to the limitations set forth below:

Original residential purchaser: An "original residential purchaser" is defined as any person who purchases the cabinetry for personal use in his or her private residence. The duration of this limited warranty begins at the date of delivery to the residence and extends until such time as that residential purchaser no longer resides at the residence. "Residential purchaser" extends to any person who owns and resides in the residence where the cabinetry is installed, for whom the cabinetry is purchased by a contractor, remodeler or other person/entity, except in commercial applications defined below.

Original commercial purchaser: An "original commercial purchaser" is any person or entity, including but not limited to landlords, leasing companies, contractors, remodelers, and private or public businesses, who purchases the cabinetry for installation and use in in any location that will be leased or used as a rental unit, or used for any other commercial or industrial application. The duration of this limited warranty is five years from the date of the product delivery to the location.

Proof of purchase is required. This limited warranty is expressly limited to repair or replacement of the cabinetry at the discretion of the manufacturer. This limited warranty does not include labor costs for removal, repairs, installation, or replacement.

This limited warranty does not cover defects, damage, or failure caused by improper handling, cleaning, installation, storage, assembly or disassembly, intentional damage, unauthorized product modifications and repairs, exposure to the elements including extreme humidity, moisture, or temperatures which may result in warping, splitting, or finish failure, accidental misuse, abuse, or negligence. Humidity levels in the home with cabinetry outside the range of 30–50% and temperature levels outside the range of 50–85°F are considered extreme.

Natural woods may vary in texture, color, and wood grain, and exhibit subtle changes as they age. For example, wood joints may develop visible cracking around the joint area and cabinet colors may darken or lighten over time.

Sunlight, smoke, moisture, household cleaners and other environmental conditions may cause materials to vary from their original color and/or to warp, split or crack. These variations are considered to be the nature of the material in relation to its environmental exposure and are not covered under this limited warranty.

THE MANUFACTURER OF AMERICAN WOODMARK CABINETRY MAKES NO OTHER WARRANTIES OTHER THAN THOSE SET FORTH HEREIN AND ALL OTHER WARRANTIES ARE HEREBY DISCLAIMED.

THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LENGTH OF THE LIMITED WARRANTY PERIOD.

THE LIMITED WARRANTIES SET FORTH HEREIN ARE LIMITED TO THE FIRST AND ORIGINAL BUYER AND ARE NOT TRANSFERABLE THEREAFTER. PROOF OF PURCHASE IS REQUIRED TO DETERMINE ELIGIBILITY.

EXCEPT AS PROVIDED IN THIS LIMITED WARRANTY AND TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE MANUFACTURER OF AMERICAN WOODMARK CABINETRY SHALL NOT BE LIABLE FOR INCIDENTAL, DIRECT, INDIRECT, CONSEQUENTIAL, OR SPECIAL DAMAGES TO THE PURCHASER OR TO ANY THIRD PARTY RESULTING FROM ANY BREACH OF WARRANTY OR CONDITION, OR UNDER ANY OTHER LEGAL THEORY, INCLUDING BUT NOT LIMITED TO: LOSS OF USE, LOST PROFITS, LOSS OF BUSINESS OPPORTUNITY, LOSS OF PROPERTY, OR OTHER ECONOMIC LOSSES. THE FOREGOING LIMITATION SHALL NOT APPLY TO PERSONAL INJURY CLAIMS OR ANY STATUTORY LIABILITY FOR INTENTIONAL AND GROSS NEGLIGENT ACTS AND/OR OMISSIONS.

Additional Exclusions, Limitations and Disclaimers

This limited warranty limits the coverage period for the following components that were not manufactured by American Woodmark:

Range hood blowers and components – one year from the date of delivery

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS AND EXCLUSIONS MAY NOT APPLY TO YOU.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

Claims

All claims under this limited warranty must be submitted to the manufacturer and must specify the defects present in the cabinets and accessories. Photos or samples of the product may be required to determine coverage.

After the manufacturer has had an opportunity to inspect the cabinets and/or accessories, it will, at its discretion, ship at no cost to the customer, replacement cabinets and/or parts necessary for repair. Products may require chemical or function testing to determine resolution of a warranty claim. Replacement products are subject to availability and may differ from those originally supplied.

Submit all claims to American Woodmark at 561 Shady Elm Road, Winchester, VA 22602, CustomerCare@WoodmarkCabinetry.com, OR 800-677-8182.

Door and Drawer Front Construction

American Woodmark uses a combination of solid hardwoods, hardwood veneers and medium density fiberboard (MDF) in the construction of our doors and drawers. Consumers should review actual samples of hardwood doors in our buying centers and cabinet displays to help establish realistic expectations of variations involving wood grain, color tones, presence of knots and so forth. More information about what to expect with different wood species can be found on page 25. The below chart shows the construction of each door style and the materials used.

DOOR STYLE: Notes

Standard Cabinet Specs

KCMA Certified

All cabinetry manufactured by American Woodmark is certified by the Kitchen Cabinet Manufacturers Association (KCMA).

KCMA sets the American National Standards Institute/KCMA 161.1-2000 uniform performance and construction standards for kitchen and vanity cabinets. The program is referenced by U.S. Government agencies; architects; builders; remodelers; and other specifiers.

Cabinets that bear the KCMA seal of certification are recognized as a quality product with the ability to perform after a rigorous battery of tests, simulating years of typical household use. Tests are performed by approved third-party independent laboratories.

American Woodmark is proud to display the KCMA seal of certification for cabinet construction.

Environmentally Responsible Stewardship

As a leading U.S. manufacturer of fine cabinetry, American Woodmark Corporation is committed to conducting business in a manner that both protects the environment and safeguards public health and safety. To achieve this end, the company proactively identifies potential environmental risks and monitors compliance with appropriate federal, state, local and internal standards.

The company has received certification by the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program on all products. The certification was awarded based on compliance across a broad range of activity including air quality, product resource management, process resource management, environmental stewardship and community relations.

The company works with all suppliers to encourage sustainable forestry practices. Wood doors, drawer fronts and cabinet front frames are made from solid woods. Particle board and plywood are purchased from suppliers that meet either the Composite Panel Association requirements for Environmentally Preferred Products or the Composite Panel Associations Eco-Certified Composite Standards.

The company uses leading edge technologies to limit both hazardous and non-hazardous emissions, byproducts and waste. Ongoing, formal programs identify opportunities for recycling and reusing materials. When waste ultimately requires disposal, steps are taken to minimize the environmental impact.

The American Woodmark Foundation supports local programs serving the community, including activities focused on maintaining the quality of life.

Our company is dedicated to doing our part in the preservation and sustainability of the environment.

Standard Cabinet Specifications

Cabinet Front Face Frames

Cabinet front face frames are made from ¾" x 1 ⅝" kiln-dried solid wood and/or engineered materials to prevent warping and provide superior strength, durability and finished appearance. Face frame joints are precision fixtured, pressure fitted and mechanically fastened.

Cabinet Side Panels

Cabinet side panels are ½" thick engineered wood. The exterior sides match cabinet finish and interior sides are finished with a natural woodgrain look. They are captured into a grooved front face frame and secured using high-strength fasteners and glue.

Cabinet Tops, Bottoms and Floors

Tops, bottoms and floors are ½" thick engineered wood. The exteriors and interiors are finished with a natural woodgrain look. They are fitted and glued into the cabinet front face frame grooves, then captured in the grooves of the cabinet side panels.

Cabinet Back

The cabinet back is made from ⅛" thick hardboard substrate. The inside cabinet surface is finished with a natural woodgrain look.

Hanging Rails

The base and vanity top hanging rail is ¾" thick solid wood, glued to the cabinet side panels. The wall cabinet hanging rails are ½" thick engineered wood, glued and mechanically fastened into the cabinet back, cabinet side panels and top/bottom.

Cabinet Shelves

Cabinet shelves are ¾" thick engineered wood. The shelves are finished with a natural woodgrain look. Shelves are edge banded on one side. All shelves are adjustable and meet KCMA load standards of 15 pounds per square foot.

Drawer Systems

Cabinets utilize natural finish dovetail hardwood drawers with fully captured bottoms and Full-Access CushionClose® Glides. All drawers meet KCMA load standards of 15 pounds per square foot.

Drawer Systems – Deep Roll-Out Trays

Deep Roll-Out Trays utilize natural finish dovetail hardwood drawers. Deep Roll-Out Trays feature Full-Access CushionClose glides and meet KCMA load standards of 15 pounds per square foot.

Corner Blocks

Corner blocks are attached to help ensure cabinet squareness and allow for proper countertop installation.

Hinges

Fully concealed, self-closing CushionClose hinges are standard on all door styles. Hinges are 6-way adjustable, allowing in/out, up/down, and side-to-side adjustments. Hinges permit doors to open to approximately 105 degrees and have a self-closing feature that allows door to close unassisted when open approximately 20–30 degrees. Hinges are all steel construction with nickelplated finish and exceed industry standard for durability.

Door Height	Number of Hinges
12" - 36"	2
39" - 50"	3

Inset Toe Kick

Inset toe kicks are constructed of ½" thick **unfinished** engineered wood and are recessed 3½". Standard toe kick dimensions are 4" high and recessed 3½".

BTK8 or BTK8 DT (matching toe kick) required for installation.

Finishing Systems & Cabinet Care

Finishing Systems

The finishing systems used on our products are designed to ensure the beauty and durability of our cabinetry. State-of-the-art equipment allows precise sanding, filling and finish coverage of each of our products. Our products are extremely resistant to stains and surface damage that can be caused by common household chemicals. Our products exceed KCMA and ANSI standards for resistance to stains like coffee, grape juice and moisture.

Cabinet Care

Remove dust from cabinets frequently with a soft lint-free cloth. The cloth may be slightly dampened with water. Do not use a paste wax type material. Wax buildup is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicone should not be used. Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus cleaners, ammonia-based cleaners, chlorine-based cleaners, steel wool, soap pads or abrasive cleaners on cabinets.

Extra care should be taken that cabinet finishes are not exposed to heat in excess of 200° Fahrenheit. Do not place or mount small appliances beneath wall cabinets. These appliances (such as coffee makers and toasters) can produce excessive heat and moisture, which can damage the finish of cabinets.

Allow Cabinets To Age Beautifully

Our cabinets showcase the careful selection of natural and engineered materials to achieve the best possible look. While every effort is made to match wood grain as closely as possible, no two pieces of wood are exactly alike, even from the same tree. These differences in natural color and grain mean that each piece will respond differently to the finishing materials used. For example, close-grained woods absorb less and will vary in color from more open-grained pieces from the very same tree. It's these variations that contribute to the beauty and distinction of quality wood products. However, exposure to sunlight, smoke and chemicals may cause some materials to fade, darken or vary from their original color over time.

This is why cabinets, doors, drawer fronts and accessories added at a later date may not exactly match cabinets installed now. For the same reasons, door samples or displays may not represent the exact color of cabinets received at the time of shipment. Consumers should also read all cleaning agent instructions carefully before application.

Due to changes that occur from natural and environmental factors a cabinet is exposed to over its lifetime, we cannot be responsible for variations that occur in the finish of natural and engineered materials as they age.

Wood Species & Characteristics

American Woodmark offers a variety of wood species; these are natural materials with inherent variations. As such, our quality standards establish tolerance ranges for matching the hardwood pieces. Consumers should review actual samples of hardwood doors in our buying centers and cabinet displays to help establish realistic expectations of variations involving wood grain, color tones, presence of knots and so forth.

These variations are at the heart of the unique natural beauty of finished hardwood. In addition, exposure of wood products to sunlight, some chemical agents and smoke can cause wood colors to change over time.

Cherry

Cherry is a close-grained, multicolored hardwood with occasional pin knots and fine grain variations appearing as curls and waves. Natural features of Cherry include:

- Small sap pockets, pin knots and streaks
- Color ranges from pale yellow sapwood to deep reddish-brown heartwood, with occasional shades of white, green, pink or even gray
- Staining reveals subtle variations and colors that typically darken over time
- Variations within a single door

Maple

Maple is an exceptionally hard, finely grained wood species with a fine, even texture. Darker stains will moderate the color variance; lighter stains mellow with golden hues over time. Natural features of Maple include:

- White to light blonde tones to dark reddish-brown tones
- Small mineral streaks of light blond or reddish brown that darken with stain
- Wavy, curly bird's-eye or burl graining as well as worm tracking across the grain that will darken when stained
- Variations within a single door

Painted

Painted finishes combine hardwoods and engineered materials including solid wood, medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with superior stability, consistency, coverage and durability. Painted door features include:

- Visible joint lines may appear due to the natural expansion and contraction of wood
- A natural aging process that may change the tone of paint colors over time

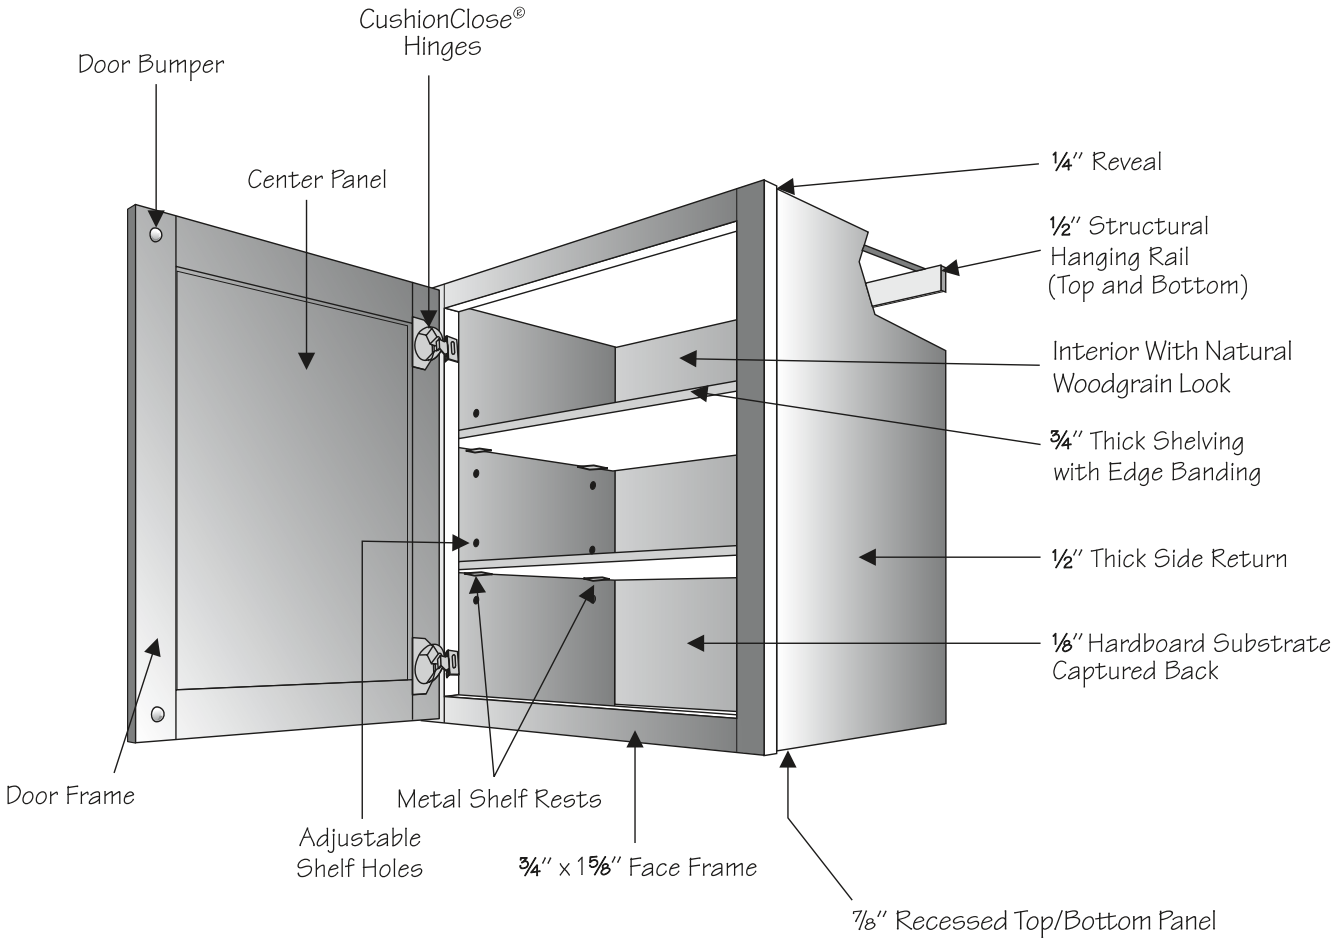

Duraform

Duraform uses highly-technological manufacturing processes to bond foils, vinyl films and coatings to medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with exceptional stability, consistency and durability. Duraform door styles feature wrapped doors and drawer fronts. All other cabinet and accessory surfaces are painted to complement the selected Duraform finish, unless otherwise noted.

- The finish, color and texture are consistent throughout the surface
- The surface is highly durable and easy to clean
- Materials are resistant to humidity and fading
- Refer to page 23 for standard cabinet box construction

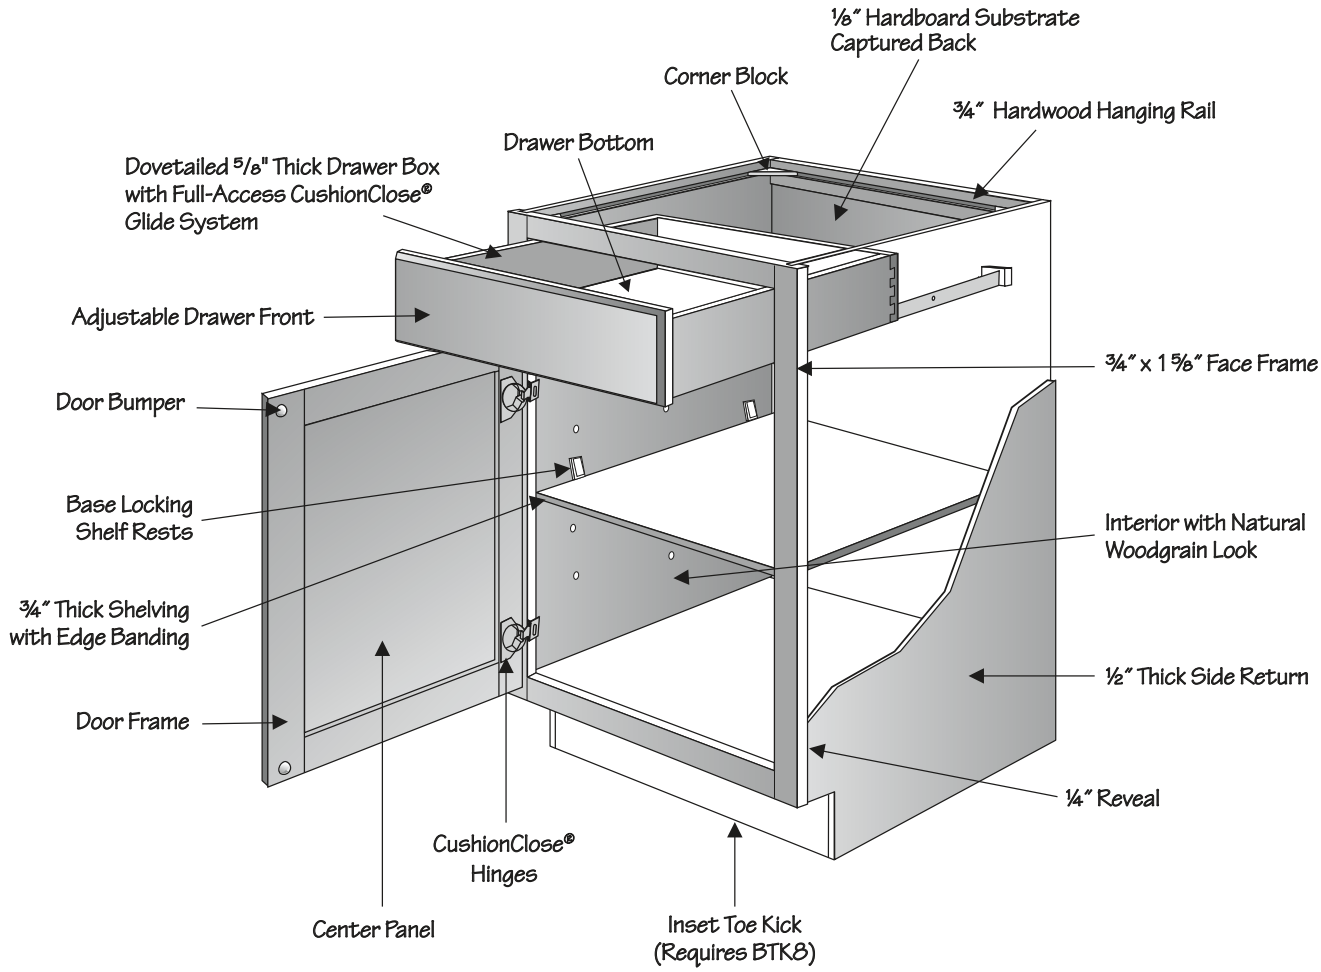

Wall Cabinet Construction

The drawing below illustrates and identifies the parts of a standard wall cabinet.

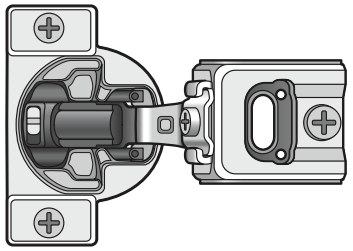

Base Cabinet Construction

The drawing below illustrates and identifies the parts of a standard base cabinet.

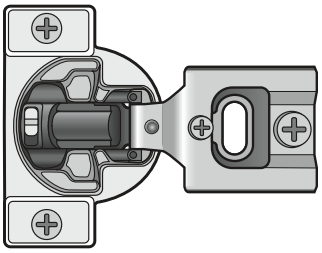

NOTE: Base single door cabinets are hinged left and can be reversed in the field.

6-Way Adjustable Full Overlay (FOL) CushionClose Door Hinge

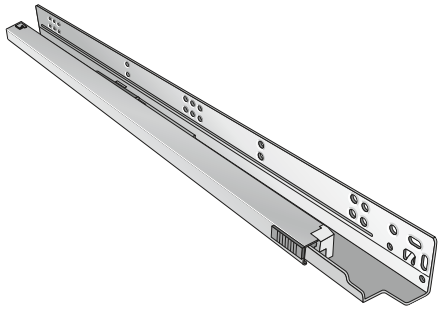

All steel construction with nickel-plated finish, Full Overlay hinge with self-closing feature that allows door to close unassisted when approximately 20–30 degrees open. Hinges permit doors to open to approximately 105 degrees. Six-way adjustability allows in/out, up/down, and side-to-side adjustments. Exceeds industry standard for durability. Standard feature on all Full Overlay (FOL) door styles. Hinge restrictors are available to order separately to limit doors to opening more than 86 degrees.

6-Way Adjustable Partial Overlay (POL) CushionClose Door Hinge

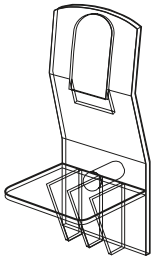

All steel construction with nickel-plated finish, Partial Overlay hinge with self-closing feature that allows door to close unassisted when approximately 20–30 degrees open. Hinges permit doors to open to approximately 105 degrees. Six-way adjustability allows in/out, up/down, and side-to-side adjustments. Exceeds industry standard for durability. Standard feature on all Partial Overlay (POL) door styles. Hinge restrictors are available to order separately to limit doors to opening more than 86 degrees.

Full-Access CushionClose Hidden Glides System

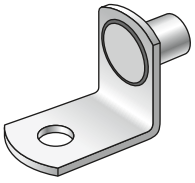

The Full-Access CushionClose Hidden Glide System features dual-telescoping glide members that are supported by precision roller-carriage bearings providing smooth, stable and quiet operation. Overlay Dimensions

The drawings shown below illustrate the relationship between the cabinet face frame and Partial Overlay (POL) and Full Overlay (FOL) doors. They show the amount of the cabinet face frame that is visible when Partial Overlay doors or Full Overlay doors are selected.

Full Overlay

Full Overlay (FOL) doors are sized to cover nearly all of the cabinet face frame. Full Overlay door styles require decorative hardware. **To facilitate proper door operation, include at least a 1" filler between the hinged side of Full Overlay door styles and deeper adjacent objects including cabinets, walls, appliances, and countertops. Blind corners may require more space from the adjacent cabinet to accommodate decorative hardware clearance.**

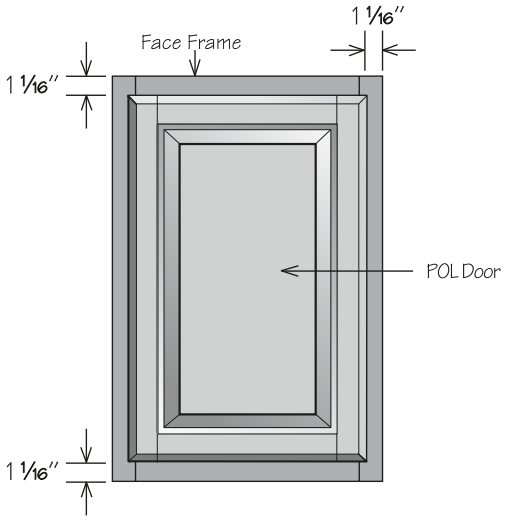

WALL CABINET FRONT

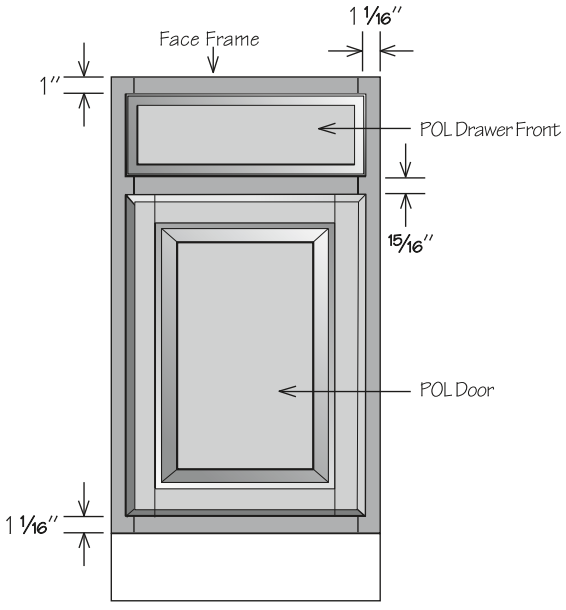

BASE CABINET FRONT

Partial Overlay

Partial Overlay (POL) doors are sized to show about an inch of the cabinet face frame, giving the door some visual depth. Some door styles do not require decorative hardware.
