Refrigerator Wall cabinets range from 12" to 27" high and are 24" deep.

To ensure proper door function on a Refrigerator Wall cabinet, allow enough clearance for the top hinge(s) on the refrigerator door. Review refrigerator manufacturer’s specifications for dimensions and clearance requirements.

When a 24" Deep Refrigerator Wall cabinet is used in a design, remember that each side of cabinet must be attached to a cabinet, wall or Refrigerator Return Panel.

Corner Wall cabinets range in height from 18” to 48”.

Cathedral Corner Wall cabinets must be ordered hinged left or right.

Square Corner Wall cabinets are hinged left and can be reversed in the field.

To ensure proper door function, cabinets or other design elements deeper than 12” should not be placed on either side of the Corner Wall cabinet.

If the Corner Wall cabinet is deeper than the adjacent cabinets, fillers are recommended for placement left and right of the Corner Wall to ensure proper door operation on standard depth wall cabinets.

For a finished, decorative look add Overlay Fillers (Full Overlay door styles) to Universal Fillers or Decorative Blocks to Fluted Beaded Fillers.
